Development of ARA software has reached a new milestone, with the system now supporting end-to-end wireless experiments in the ARA sandbox. This includes use of the AraHaul link. [A demo recording is available online.](#)

The ARA team also presented alongside partner Ericsson this month to the Connectivity Demand Working Group of the FCC Task Force on Precision Agriculture. The presentation covered application use cases for multiple agricultural environments including crop farms, livestock farms, grain mills, barns, and biorefineries.

The Colosseum team is organizing a 3 day in-person master class for Ph.D. students and Postdoc researchers who are interested in using the Colosseum channel emulator for their research. The course will include tutorial-like presentations from Colosseum experts, hands-on assignments for the attendees, invited talks, and a site visit to the Colosseum data center facility.

The event will take place June 6-8, 2022 at the Northeastern University Boston and Burlington campuses, and is open to Ph.D. students and postdocs affiliated with research institutions in the United States. More information on Young Gladiators can be [found online](#). The event is co-located with the NSF [Workshop on Radio Frequency Dataset Generation, Access, and Sharing](#).
